

SFirm apps

# SFirm goes mobile – Finance cockpit and Signature folder for decider

## SFirm with you at all times thanks to the Finance cockpit.

From now you can access account balances and trends, turnovers and open payment mandates directly from your SFirm. The app "SFirm Signature folder" opens with the tap of a finger. It allows you to authorize payments securely via EBICS (see the reverse of this information).

### Comfortable and versatile.

Its simple, easy and fast operation will win you over. The app is compatible with many banks and can thus map many different banks.

The Finance cockpit uses push messages to inform you of changes in your company's finances at the very moment a loan officer processes them.

### Fast creation via QR code.

Installing the Finance cockpit is simple:

1. Download the app in the Apple App Store or Google Play Store onto your smartphone or tablet (iOS 8.0 or higher/Android 4.2 or higher).
2. Use the QR code to link the Finance cockpit with SFirm on your desktop (version 4.0 or higher).
3. And off you go. A short video tutorial in the app shows you how the linking is done.

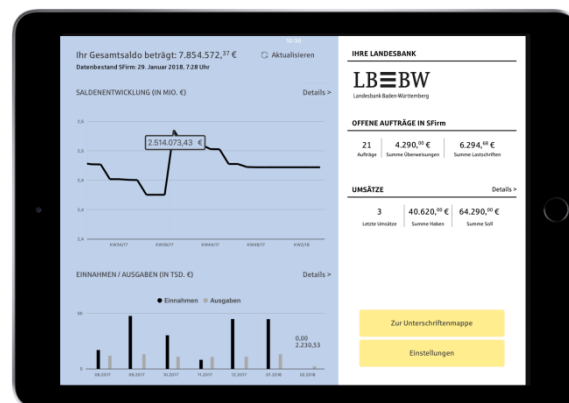

No further activation by LBBW or system integration into your company's own network or payment systems is required.

## Security audited by TÜV and German data center.

Strong security features and an individual access code protect your data. Data is encrypted prior to storing while transmissions are subject to transport and content encryption.

In addition, your SFirm data is only temporarily stored on a server and hosted in a Savings Bank data center in Germany. Once it has been collected by the Finance cockpit it is deleted. You have the option to restrict the data displayed.

The app is tested and certified every year by TÜV.

## Quick and easy activation with SFirm ENTERPRISE

Once you as a company customer of LBBW have licensed the SFirm ENTERPRISE package you can link it with your SFirm up to five times.

## SFirm Signature folder - approve EBICS payments on the move.

With the Signature folder on your smartphone or tablet, you can approve or reject EBICS payments, and get information about your company's pending payments on the go.

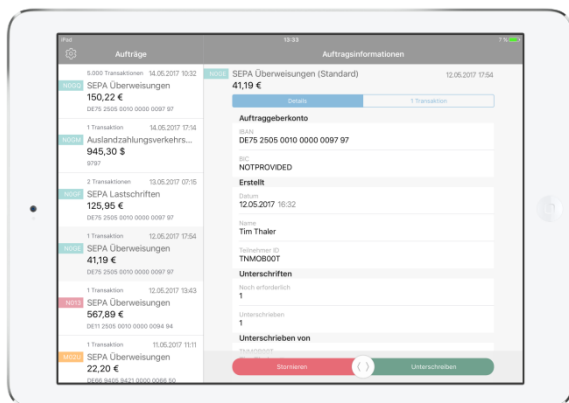

### Comfortable and versatile

Its simple, easy and fast operation will win you over. The app is compatible with many banks and can thus map many different banks. It is also possible to transfer bank access information from other financial programs.

### Fast creation via QR code

Installing the SFirm Signature folder is simple:

1. Download the app (grey icon) in the Apple App Store or Google Play Store onto your smartphone or tablet (iOS 8.0 or higher/Android 4.2 or higher).
2. Use the QR code to link the Signature folder with SFirm on your desktop (version 3.0 or higher). And off you go. Short instruction videos in the app show you how to set up the bank key via QR code.
3. No further activation by LBBW or system integration into your company's own network or payment systems is required.

## Security audited by TÜV

You complete every payment authorization with your EU password. Because this password cannot be stored in the app, you are the only one who can conclude these payment transactions.

Very high security standards and multi-level passwords keep your data safe and prevent it from being used by strangers, even if you lose your smartphone or tablet.

The app is tested and certified every year by TÜV.

### Technology and more

The Signature folder uses the process of Distributed Electronic Signature (VEU).

All you need to do is make your data available in the EBICS standard (version 2.5).

The app uses the following EBICS order types:

1. HPB (download bank key)
2. HVZ (download VEU overview with additional information)
3. HVT (retrieve VEU transaction details)
4. HVE (add signature)
5. HVS (cancel VEU)
6. HEV (download supported EBICS versions)
7. INI (send EU key)
8. HIA (send authentication / encryption key)

## Quick and easy activation with SFirm COMFORT and ENTERPRISE

If you as company customer of LBBW have licensed the SFirm COMFORT or ENTERPRISE package, you will be provided with three (COMFORT) or ten (ENTERPRISE) license codes to use all of the features of the app.
